2/26/2020

1 Milestone #4

This is the fourth milestone for my final replication project for Gov 1006.¹ My github repository can be found here.²

I am now replicating “What the Demolition of Public Housing Teaches Us about the Impact of Racial Threat on Political Behavior”, by Ryan D. Enos. The central research question of this paper is, how does the context in which a person lives affect his or her political behavior (Enos, Ryan D. 2016)? Professor Enos has provided his replication data (Enos 2014).

Here is an example of a table made using GT:

a	b	c
16	11	11
15	12	10
17	10	18
14	10	10
15	13	16
10	15	12
14	11	14
17	13	16

Here is an example of a regression table made using GT Summary:

Characteristic	Beta	95% CI ¹	p-value
data2\$a	-0.02	-1.2, 1.1	>0.9

¹CI = Confidence Interval

2 Milestone #5

turning these in LATE, but working on them

¹Gov 1006: Models, this is an example of a footnote.

²https://github.com/nschrage/replication_2

3 Milestone #6

Appendix:

A clear statement about what aspects of the paper you were able to replicate and which parts, if any, you were not able to replicate.

500 words about your proposed extension. You do not have to have done the extension yet.
